### 2 [Compiler-directed run-time monitoring of program data access](#)

Chen Ding, Yutao Zhong

June 2002 **ACM SIGPLAN Notices , Proceedings of the 2002 workshop on Memory system performance MSP '02**, Volume 38 Issue 2 supplement**Publisher:** ACM PressFull text available: [pdf\(1.40 MB\)](#)Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

Accurate run-time analysis has been expensive for complex programs, in part because most methods perform on all a data. Some applications require only partial reorganization. An example of this is off-loading infrequently used data from a mobile device. Complete monitoring is not necessary because not all accesses can reach the displaced data. To support partial monitoring, this paper presents a framework that includes a source-to-source C compiler and a run-time monitor. The compiler inserts ru ...
